POLYFLEX® PES-135

Increasing expectations in terms of preserving the value of buildings, the desire for architectonic free the environment and climate require coating methods of excellent flexibility and durability on facades. Our tried and tested and constantly upgrade to tried and tested and constantly upgraded facadequality POLYFLEX[®] PES-135 meets all the required properties of a modern facade powder coating.

Performance profile: your added value!

Aesthetics and durability

The good resistance to light and weather of POLYFLEX® PES-135 guarantees high gloss and colour stability. Besides monochrome surfaces with various levels of gloss, brilliant and long-lasting pearl-metallic effects are also possible. he easy application and short, energy-saving baking

POLYFLEX[®] PES-135 holds the international label of

- No special labelling required
- Environment and resource-saving manufacturing and processing

Highly efficient

- High coverage and very good opacity
- Brilliant effect creations applied safely
- Gas-oven stabilised

Wide-ranging properties

- Good storage stability
- Very good corrosion resistance
- Very good mechanical properties
- No toxic substances

Features: your benefits!

Outstanding properties

- Excellent light, colour and non-chalking stability
- Excellent weather-resistance
- ✓ Very good flow
- Very good opacity
- ✓ Stabilised against over baking

Applications: your benefits!		
Examples of applications		
 Metal facades Sun-protection systems Aluminium profiles Gates Doors Frames Windows Various facades element
